The Planetarium was returned to the manufacturer for some essential maintenance in July 2018. When it was returned the configuration had changed slightly affecting video content playback.

This means that for most videos they won't start on the dome but on the secondary screen.

It may require some user intervention to get the content to display on the dome.

You will need the keyboard switched on to follow this procedure.

Please follow this sequence to move the content over:

1. Select required video by double clicking it – if it starts playing on the secondary screen press the space bar to pause the video.
2. Press F to toggle into windows mode.
3. Drag the video using the mouse on to the dome (drag right until it disappears from the secondary screen and appears on the dome).
4. Press F (again) to return to full screen.
5. Press the space bar again to resume play.

PLEASE NOTE the system doesn't 'remember' that you've done this if you have restarted the system so this procedure **MUST** be followed each time you set up the system and each time you have rebooted it.

PLUS you will need to follow this procedure for each video you play.

It is recommended that you setup the system and test play each video before you let students in.

**REPORT any concerns or damage immediately to  
MRS on Planetarium@mrus.co.uk**
